

Vue-router

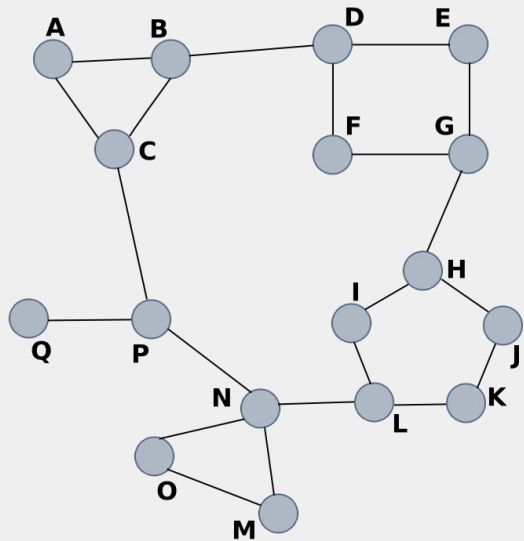

Let's route it!

christoffer.wallenberg@zocom.se

ZoCom

Vad är en router?

- Används för att bygga **Single Page Apps**
- Håller koll på **navigeringen** i din app
- *Dynamisk* navigering ex: user/:userId
- *Nestad* navigering ex. user/:userId/settings
- Ger mycket kontroll över navigeringen

vue-router

var kommer componenten dyka upp?

```
<router-view/>
```

vue-router

Du kan också skicka med props till en view. Books hamnar här i alla views

```
<router-view v-bind:books="books" />
```

vue-router

initiera i **main.js**

```
import Vue from 'vue'
```

```
import VueRouter from 'vue-router'
```

```
Vue.use(VueRouter)
```

vue-router

statisk route

```
const routes = [  
  {  
    path: '/',  
    component: Home  
  },  
]  
const router = new VueRouter({  
  routes  
})
```

vue-router

Dynamisk route

```
const routes = [  
  {  
    path: '/user/:id',  
    component: Home  
  },  
]  
  
const router = new VueRouter({  
  routes  
})
```

vue-router

nested routes

```
const routes = [  
  {  
    path: '/user/:id', component: User,  
    children : [  
      { path: '/profile', component: Profile },  
      { path: '/posts', component: Posts }  
    ]  
  }  
]
```
